

CALL FOR SYMPOSIA

FEPS and the Spanish Society for Physiological sciences (SECF) partner societies invite you to submit symposium proposals. Symposia are an essential part of the congress and should reflect cutting edge science in all subdisciplines of physiology. Don't miss the chance to present your field of interest to the global physiological community.

GENERAL INFORMATION

We are looking for Symposia covering hot topics in Physiology and creating something greater than the sum of their parts. We want to see speakers chosen whose ideas synergize with one another or perhaps create discord. Either way, we want symposia submissions that help moving the field forward and address significant physiological problems with interdisciplinary endeavors.

Up to 8 symposia will be selected by the Scientific Committee. Each will last 1 hour and 30 minutes and must address scientific issues around a coherent theme of interest to a broad audience.

Choice of Chairpersons and Speakers

Recommendations

The basic criteria for selection are the scientific interest of the topics, the achievements of the speakers in the field, and their ability to present their work to a broad multidisciplinary audience. Preference will be given to symposia that tackle a topic from various angles and aim to present different views and opinions rather than presenting the work of collaborating groups. The balance of gender, 'scientific seniority' and geographical distribution of the affiliation of speakers will be taken into consideration by the Scientific Committee in the selection procedure.

Speakers/chairpersons

A proposal should include 4 speakers. Two senior speakers (30 min) + 2 early career speakers (max. 10 years after graduation; 15 min) Symposia are chaired by 1 or 2 persons who are responsible to lead the discussion during the session. No more than 1 chairperson can be among

the speakers. Early career as well as senior scientists are encouraged to participate in the proposals. However, all speakers should be experienced in presenting their research to a broad multidisciplinary audience.

Countries

The involvement of scientists should involve any scientist from any country as chairperson and/or speaker. The proposed speakers/chairpersons at the symposium should preferably belong to different countries. Never exceed 2 speakers from the same country, provided that they are from different institutions.

Gender

Eligibility of proposals for symposia is depending on the inclusion of both genders in the list of speakers. Single-gender symposia will not be considered.

Dates and Deadlines

November 10, 2023. Submission for symposium proposals open

December 20, 2023. Deadline for symposium proposals

Decision on Proposals

The Scientific Committee will examine all proposals, which are complete and follow the rules. Proposals may be accepted as they stand. In some cases, the Program Committee may accept a proposal provided that the organizers include modifications necessary to improve the proposal and/or to make it coherent with other selected symposia. Decisions will be sent by email to the participants shortly after the Scientific Committee meeting following the deadline for submissions. The proposals will be accepted only once the organizers have replied, accepted the congress conditions and confirmed their participation.

Funding

It is expected that symposia are self-funded.

Necessary Items for Proposal Submission

List of items necessary to include in the forms during the submission period:

Proposal page

- Title: < 150 characters.
- Brief description: 250 words maximum

Chairperson & speaker pages

- Title of presentation (tentative, for speakers only): < 150 characters
- Name, status, affiliation, country, email
- Publications: up to five relevant publications in the last 5 years

Sent your proposals to: secf@secf.es or vicente.martinez@uab.es
