ACTA PHYSIOLOGICA RISING STAR AWARD

The Acta Physiologica Rising Star Award is granted to a young physiologist who has substantially contributed to the advancement of their field through ground-breaking research. The successful candidate will have developed a progressive, world-class research profile as an independent investigator, demonstrated by an excellent record of scientific dissemination. The prize will be awarded at the Annual Meeting of the Federation of European Physiological Societies (FEPS), Granada (Spain), September 4-6, 2024. The awardee will present a keynote lecture of her/his work and author an accompanying review article in Acta Physiologica. For the 2024 Award, nominations are open to candidates under the age of 40 as of December 31, 2024, with allowances made for documented career breaks, who have been employed at a European academic institution in the past 2 years. The deadline for nominations is May 29, 2024. A full CV including publication list should accompany this nomination form.
